

DUNES RESTORATION UPDATE
(Crawler at Dawn - below)

The dune restoration project is on pace with the contractor wrapping up “Phase 1” of the project in April. Approximately 150/200 truck-loads of beach-compatible sand are being deposited daily at each staging location - Jungle Hunt Park & Varn Park. 15 ATV crawlers are transporting the sand on the beach and back-filling the

dunes. Please remember, Phase 1 represents 70,000 plus cubic yards of sand which is only 1/3 of what was lost in Hurricane Matthew.

Progress updates will be provided at the Hammock Dunes Annual Meeting on March 27, 2017 at 10am in the Hammock Dunes Club. Additionally, we will post a video of the progress on www.hammockdunes.com next week!

Lastly, there have been several reports of Hammock Dunes owners (or their guests) jumping over the dunes down to the beach. Please be advised the Hammock Dunes Beach is CLOSED. All reports of people crossing the dunes should be reported to the main gate house immediately - 386-446-6234. Owners or their guests that cross the dune will be reported to the Flagler County Sheriff's Office!

More updates to follow!

Thank you!
